

Heat Map of Reported COVID-19 Cases for the Last 14 Days (March 27, 2020)

This map shows reported cases for the previous 14 days, as that is the timeframe for when an individual would be contagious. **However, there are many people within our communities who have the virus and have never been tested, and because of this, we'll never have information that accurately represents every case of COVID-19.**

Regardless of the number of reported cases within an area, all South Carolinians should take seriously the recommended precautions for protecting against this disease.

COVID-19 Cases

As of 11:59 PM on 3/27/2020

Note for the last 14 days
